## **Lone Butte Solar Connection Notice of application filing and project update**

Thank you for your ongoing participation in the Lone Butte Solar Connection project. We submitted an application for the project to the Alberta Utilities Commission (AUC) on March 19, 2026. Below is an update and an outline of the next steps in the AUC process.

### **Project update and background**

AltaLink is proposing to construct up to 17 kilometres of new 240 kilovolt (kV) transmission line to be named 929AL. The new transmission line will connect ACCIONA Energía's proposed Lone Butte 1801S Substation to AltaLink's existing 929L transmission line.

Approximately four kilometres of the new transmission line will be located within ATCO's service territory. AltaLink and ATCO have jointly filed the application with the AUC. If the project is approved, each company will own and operate its respective portion of the transmission line. ATCO's portion of the line will be named 9LA929.

Please see the maps included in this package for an overview of the project area.

### **Next steps**

The AUC will review the application and can approve, approve with conditions or deny the project. The AUC may also host a hearing regarding the project. To learn more about the AUC process and how you can become involved please visit [www.auc.ab.ca](http://www.auc.ab.ca).
