#### Project background

AltaLink is proposing to construct up to 17 kilometres of new 240 kilovolt (kV) transmission line to be named 929AL. The new transmission line will connect ACCIONA Energía's proposed Lone Butte 1801S Substation to AltaLink's existing 929L transmission line.

AltaLink's connection and ACCIONA Energía's solar project are separate. This open house will only present information about AltaLink's project.
