### **Luna Solar Battery Phase 1 Connection – Project cancellation notification**

Thank you for your participation in the Luna Solar Battery Phase 1 Connection. In December 2024, AltaLink began consulting with stakeholders on the proposed project and filed a Facility Application to the Alberta Utilities Commission in July 2025.

This letter is to inform you that on January 6, 2025, Northland Power Luna I GP Inc. requested to cancel their system access service request with the Alberta Electric System Operator (AESO). As a result, AltaLink's related project is no longer required.

If you have questions about Northland Power's project, please contact John Olsen, Senior Project Developer at 403-542-9176 or [john.olsen@edf-re.com](mailto:john.olsen@edf-re.com)

If you have questions about the cancelled request for system access service, please contact the AESO at 1-888-866-2959 or [stakeholder.relations@aeso.ca](mailto:stakeholder.relations@aeso.ca).

### **Project background**

To connect Northland Power Luna I GP Inc.'s previously proposed project to the grid, AltaLink had proposed to:

- add one new structure to its 923L/935L transmission line at one of two locations
- build approximately 800 metres of temporary transmission line to ensure a reliable supply of power during construction; this temporary transmission line was to be removed once construction is complete
- install a new telecommunications tower within Northland's proposed Apollo Substation, which was proposed be located at either SE-35-18-17-W4 or SE-36-18-17-W4

### **Contact us**

We are available to address any questions or concerns you may have. Please contact us at [stakeholderrelations@altalink.ca](mailto:stakeholderrelations@altalink.ca) or 1-877-267-1453. You can also view more information about the project at <http://www.altalink.ca/projects>.

Sincerely,

Kris Gladue  
Manager, Stakeholder Engagement
