

Cancellation of the Big Rock Solar Battery Project Connection

The Enerfin Energy Company of Canada Inc. (Enerfin; now Atlantica Canada Development Company Inc.) request for transmission system access to connect its proposed Big Rock Solar Battery Project (Facility) in the High River area has been cancelled.

BACKGROUND

The AESO originally approved the transmission facility project required to respond to Enerfin's request for system access service under section 501.3 of the ISO rules, *Abbreviated Needs Approval Process*. The ANAP approval included the following transmission developments:

- Add one 138 kilovolt (kV) transmission line, to connect the Facility to the existing 138 kV transmission line 812L using a T-tap configuration.
- Modify the existing High River 65S substation, including adding one 138 kV circuit breaker.
- Add or modify associated equipment as required for the above transmission developments.

NEXT STEPS

The above developments are no longer needed; therefore, the AESO will rescind its ANAP approval for the Project.

Information related to the Big Rock Solar Battery project is available on the AESO's website at <https://www.aeso.ca/grid/transmission-projects/>

WHO IS THE AESO?

The Alberta Electric System Operator (AESO) plans and operates Alberta's electricity grid and wholesale electricity market safely, reliably and in the public interest of all Albertans. We are a not-for-profit organization with no financial interest or investment of any kind in the power industry.

We appreciate your views, both on the need for transmission system development and proposed transmission plans. If you have any questions or comments, please contact us directly.
