Provost to Edgerton and Nilrem to Vermilion (PENV) Transmission Development – Nilrem to Vermilion cancellation notification

You are receiving this letter because you are near Provost to Edgerton and Nilrem to Vermilion (PENV) Transmission Development, and we want to provide you with an update on the Nilrem to Vermilion project.

In October 2021, we shared that the Alberta Utilities Commission denied the Facility Application that was filed for the Nilrem to Vermilion project at that time and that AltaLink may be required to file a new application for this project.

Since then, the Alberta Electric System Operator (AESO) has determined that this development is no longer required and has officially cancelled the project.

Information from the AESO is also included with this letter as a reference. If you have questions about the cancellation, please contact the AESO at 1-888-866-2959 or stakeholder.relations@aeso.ca.

We want to thank you for your patience and ongoing participation in the development of this project.

Project background

AltaLink's portion of the proposed Nilrem to Vermilion project included:

- Building approximately 70-80 kilometres of new single circuit 240 kilovolt (kV) transmission line connecting the Nilrem Substation, located southeast of the Town of Hardisty, to a new ATCO Electric line, located north of the Village of Irma
- Modifications to the Nilrem Substation to accommodate the new transmission line

ATCO Electric also had a portion of the Nilrem to Vermilion project in its service area. If you have questions regarding their portion of the project, please contact them directly at 1-855-420-5775 (toll free) or consultation@atcoelectric.com.

Contact us

We are available to address any questions or concerns you may have. Please contact us at stakeholderrelations@altalink.ca or 1-877-267-1453. You can also view more information about the project at www.altalink.ca/projects.

Sincerely,

Kris Gladue

Manager, Stakeholder Engagement
