Provost to Edgerton and Nilrem to Vermilion (PENV) Transmission Development – Provost to Edgerton Project update

Thank you for your ongoing participation in the Provost to Edgerton and Nilrem to Vermilion (PENV) Transmission Development. Earlier in January, we advised you that we submitted an application for the Provost to Edgerton project to the Alberta Utilities Commission (AUC) on December 11, 2020.

We also want to notify you of one potential route variant that we are now considering to the preferred variant south route. The route modification, which is in proximity to your property, is shown on the map included in this package. As a potentially impacted stakeholder, we would like to get your feedback.

Stakeholder suggested modification to the preferred variant south route

As a result of stakeholder consultation, AltaLink is considering one stakeholder suggested route modification that would modify and extend the preferred variant south route approximately one kilometre farther south. This new suggested route variant is shown as route segment A7-A9-A12 in green on the map included in this package.

As you own or occupy property located near this potential route modification, we would like to get your input to help us determine if we will update our application with this modification for the AUC's consideration. You can contact us by telephone, email, mail or through our website. Our contact information is provided at the end of this notification.

Next steps

The AUC will review the application and can approve, approve with conditions or deny the project. The AUC may also host a hearing regarding the project. To learn more about the AUC process and how you can become involved please visit www.auc.ab.ca. We will notify you of the AUC's decision regarding the project. If approved, the construction of the Provost to Edgerton development will be staged to align with generation and need milestones in the area.

The application

The application (No. 26171) can be viewed on the AUC's website at www.auc.ab.ca.

To access the application, click on the 'eFiling System Login' button on the left side of the page and log in to your eFiling account. If you do not have an account, select 'New Account' and follow the steps onscreen. Please note any questions or concerns regarding account creation and management should be directed towards the AUC at info@auc.ab.ca.

Once your account has been created and you have successfully logged in, enter 26171 into the 'Go to...' search bar on the left side of the page to locate the application. Alternatively, you can navigate to 'Find', click 'Proceedings' and enter "PENV" into the 'Description' search bar.

If you have any issues accessing the application, please contact us at the details below and we will mail a copy of the application to you.

Project background

AltaLink's portion of the proposed PENV Transmission Development is located in Flagstaff County, the Municipal District (MD) of Wainwright, the MD of Provost, the County of Minburn and the County of Vermilion River. The construction of the Provost to Edgerton development will be staged to align with generation and need milestones in the area. It includes two separate developments. If approved, the Provost to Edgerton development involves:

- Approximately 45-60 kilometres of new 240 kilovolt (kV) transmission line from an area west of the Town of Provost to an area north of the Village of Edgerton
- Modifications at the existing Hansman Lake and Edgerton substations

Contact us

We are available to address any questions or concerns you may have. Please contact us at stakeholderrelations@altalink.ca or 1-877-267-1453. Further information about this project and maps are available at <http://www.altalink.ca/projects/view/330/provost-to-edgerton-and-nilrem-to-vermilion-penv-transmission-development>.

Sincerely,

Dave Lee
Manager, Stakeholder Engagement
