

How to read your map

This map will help you locate proposed routes in relation to your property. The side titled Detailed Base highlights routing criteria such as residences and environmental considerations. The side titled Detailed Photo is an aerial image and provides landscape details. The black dots and corresponding letters and numbers (for example A10) will help you identify the route you are closest to.

- Proposed Transmission Line
- Proposed 610L Transmission Line Salvage
- Proposed 610L Transmission Line Rebuild
- Proposed Temporary Transmission Line

For additional details, please refer to the strip maps (SM) included in your package. Although there are two proposed routes, if the project is approved by the Alberta Utilities Commission, only one route will be constructed.

LEGEND
