

NOTES

NOTES IN THIS SECTION DESCRIBE COMMENTS AND MODIFICATIONS THAT PERTAIN TO A SPECIFIC SECTION OF THE TRANSMISSION ROUTE:

In areas where the transmission line is being modified, an additional 15 metres of construction workspace is required on both sides of the existing right-of-way to facilitate equipment travel and working areas near the structures.

At locations where the transmission structure will be replaced, a new structure will be constructed adjacent to the existing structure. The existing structure will be removed after construction of the new structure is complete.

At locations where the transmission structure is proposed to be modified, the existing structure will remain in its current location and only the cross-arms on the structure will be replaced.
