Solar Krafte Vauxhall Connection – Project cancellation notification

Thank you for your participation in the Solar Krafte Utilities Inc. (Solar Krafte) Vauxhall Connection. In May 2020, AltaLink began consulting with stakeholders on the proposed project.

This letter is to inform you that on November 21, 2025, Solar Krafte requested to cancel their system access service request with the Alberta Electric System Operator (AESO). As a result, AltaLink's related project is no longer required.

If you have questions about Solar Krafte's project, please contact them at 403-879-9768 or engineering@solarkrafte.com.

If you have questions about the cancelled request for system access service, please contact the AESO at 1-888-866-2959 or stakeholder.relations@aeso.ca.

Project background

Solar Krafte had proposed to construct a new substation as part of their proposed Vauxhall Solar Farm in the Municipal District of Taber, approximately three kilometres north of the Town of Vauxhall. To connect the Vauxhall Solar Farm to the grid, AltaLink had proposed to:

- construct approximately 100 metres of new 138 kilovolt (kV) transmission line between an existing transmission line (called 763L) and Solar Krafte's proposed Solstice Substation, located in SE-20-13-16 W4
- install approximately three kilometres of fibre optic cable in the road allowance between AltaLink's existing Vauxhall Substation and Solar Krafte's Solstice Substation

Contact us

We are available to address any questions or concerns you may have. Please contact us at stakeholderrelations@altalink.ca or 1-877-267-1453. You can also view more information about the project at <http://www.altalink.ca/projects>.

Sincerely,

Kris Gladue
Manager, Stakeholder Engagement
